WHY PACIFIC AIR CONTROL?

Quality Assured

» WHO WE ARE

Pacific Air Control, Inc. was founded in 1977. With over thirty years in the Heating, Ventilation, and Air Conditioning industry, PAC's owner, recognized the need for a high quality, dependable, and value oriented service and construction company with a strong focus on building long-term partnerships within the Commercial HVAC Industry. At Pacific Air Control, we have the expertise to work on most types of commercial HVAC and control systems and our technicians receive rigorous ongoing training to stay ahead of the technological advances within the industry. Our technicians are also trained on older equipment to service our customers that own or manage renovated historical office buildings with older HVAC systems. By maintaining a wide variety of office buildings, financial institutions, medical facilities, government institutions, telecommunications cellular sites and computer rooms, Pacific Air Control has decades of combined experience to offer our clients.

» "Pacific Air Control's office team has provided excellent support in achieving our maintenance goals with exceptional technical assistance, timely repair proposals, scheduling, and dispatch."
~Charles Friend, Chief Engineer, Schnitzer West, LLC

» SERVICE OFFERINGS

At Pacific Air Control, we have a proven track record maintaining and providing HVAC services for property management, building owners, municipalities, retail, government facilities, and telecom industry. We take pride in the reliability and technical excellence of our services.
