— Quality Assured —

## » ABOUT US

**Pacific Air Control, Inc.  
was founded in 1977.**

With over thirty years in the Heating, Ventilation, and Air Conditioning industry, PAC's owner recognized the need for a high quality, dependable, and value oriented service and construction company with a strong focus on building long-term partnerships within the Commercial HVAC Industry. At Pacific Air Control, we have the expertise to work on most types of commercial HVAC and control systems and our technicians receive rigorous ongoing training to stay ahead of the technological advances within the industry. Our technicians are also trained on older equipment to service our customers that own or manage renovated historical office buildings with older HVAC systems. By maintaining a wide variety of office buildings, financial institutions, medical facilities, government institutions, telecommunications cellular sites and computer rooms, Pacific Air Control has decades of combined experience to offer our clients.

and Antenna Sites

"I want to take the time to let you know in writing how pleased the City of Mill Creek is with the consideration that has been demonstrated by your employees working in our city hall building. It is common for me to receive complaints from other departments on how construction operations are negatively affecting their operations. It is very unusual for me to receive compliments on how considerate the construction workers are and the extra effort they are taking to minimize disruptions. Yet that is exactly the comments I have received from several departments regarding the work being performed by your crew in our city hall HVAC control system upgrade. Please pass on to your crew our appreciation for their efforts not only to minimize disruptions but the care they have demonstrated in cleaning up each day after they are done working.

~ Tom Gathmann, P.E. | Public Works Director
